FRAMEWORK PIECES:

1. Master Trading Agreement (MTA)
2. Proprietary Account Purchase Agreement (PAPA)

ISSUED BY: BUYBIT Legal & Compliance Department

SYSTEM RECORD DATE: 20th May, 2026

MASTER TRADING AGREEMENT

PART I — GENERAL RULES & OPERATIONAL BOUNDARIES

This Master Trading Agreement (the "Agreement" or "MTA") is entered into and made effective as of **20th May, 2026** (the "Effective Date"), by and between **BUYBIT Proprietary Operations Ltd.**, hereinafter referred to as the "Platform," and the individual or legal corporate entity accessing the proprietary trading account infrastructure, hereinafter referred to as the "Trader."

WHEREAS, the Platform owns, maintains, and provides high-fidelity electronic execution trading systems, data feeds, and proprietary capital balances managed via authorized third-party broker or liquidity networks; and

WHEREAS, the Trader desires to obtain allocation access to the Platform's simulated or active capital environments to deploy algorithmic or manual trading strategies under strict risk parameters defined herein;

NOW, THEREFORE, in consideration of the mutual covenants, terms, and payment structures contained herein, the parties agree as follows:

ARTICLE I: DEFINITIONS & SYSTEM INFRASTRUCTURE

1.1 "Account Allocation" refers to the maximum buying power or virtual capital balance designated to the Trader's sub-interface, fixed at an absolute benchmark of $80,000.00 USD.

1.2 "Execution Partner" refers to the regulated clearing broker or liquidity provider utilized by BUYBIT to track, evaluate, or route execution orders filled within the software interface.

1.3 "Data Feed" means the real-time financial market price data pushed to the interface, subject to standard exchange operational rules.

ARTICLE II: RISK PARAMETERS & ACCOUNT COMPLIANCE

2.1 Margin Guidelines: The Trader must adhere strictly to all integrated platform margin boundaries, maximum drawdown parameters, and daily loss boundaries as monitored by the live compliance dashboard.

2.2 Permitted Strategies: Only standard execution strategies that comply with realistic liquidity routing are permitted. Any arbitrage manipulation, systemic data latency abuse, or high-frequency quote stuffing constitutes a material breach of this Agreement.

2.3 KYC/AML Mandates: The Trader must complete comprehensive identity validation checks before any live platform access or future withdrawal distributions are authorized.

ARTICLE III: PERFORMANCE OPTIMIZATION & CAPITAL PAYOUTS

3.1 Complete Return Allocation: Net trading returns generated on the allocated balance will be fully assigned to the Trader. The Platform waives performance split deductions under this optimized tier, ensuring maximum capital incentive retention for the Trader.

3.2 Settlement Terms: Withdrawals are processed within scheduled intervals specified in the dashboard, subject to a transactional settlement fee of 1% to 3% (or a flat $25.00 to $100.00 charge per request).

PROP ACCOUNT PURCHASE AGREEMENT

PART II — TRANSACTION TERMS & CAPITAL DELIVERY

This Proprietary Account Purchase Agreement (the "Purchase Agreement" or "PAPA") governs the specific purchase transaction, non-escalating capital access terms, and setup fees linked to the $80,000.00 USD allocation package.

SECTION 1: FINANCIAL ALLOCATION & STANDARDIZED FEE BREAKDOWN

The structured, non-escalating financial architecture required for infrastructure deployment and provisioning is formalized under the following schedule:

Allocation Line Item	Contractual Standard Cost (USD)	Billing Terms & Recurrence Framework
Account Purchase Fee	$15,000.00	One-time upfront baseline acquisition cost for the $80,000 portfolio allocation space.
Activation & Setup Fee	$1,000.00	Onboarding software deployment, digital access initialization, and secure identity compliance validation.
Broker / Data Feed Fee	$500.00	Institutional liquidity routing infrastructure and dedicated low-latency exchange data feed maintenance.
Risk Buffer / Reserve Balance	$1,500.00	Localized draw-down mitigation pool and integrated capital protection reserve.
TOTAL CONSOLIDATED OUTLAY	**$18,000.00**	**All-inclusive total procurement fee granting complete entry to the funded portfolio.**

SECTION 2: NON-ESCALATION GUARANTEE

BUYBIT explicitly warrants that the fee architecture provided in Section 1 is transparent, fixed, and non-escalating. No unexpected premium demands, retroactive subscription costs, or uncontracted fees will be introduced post-execution of this contract pack.

SECTION 3: DELIVERY OF INFRASTRUCTURE CREDENTIALS & FUNDING TRIGGER

Upon the complete electronic execution and acceptance of both documents within this contract pack, the Platform shall deliver secure digital network access credentials to the Trader within twenty-four (24) business hours. Delivery must occur via official institutional email channels. Communication via informal consumer messengers (e.g., WhatsApp or Telegram) is strictly unauthorized for primary infrastructure provisioning. Following the successful issuance of these digital credentials, the system will prompt the Trader to complete the consolidated $18,000.00 purchase payment, which instantly activates and grants live trading access to the $80,000.00 funded portfolio.

SECTION 4: GOVERNING LAW & DISPUTE RESOLUTION

This Contract Pack, encompassing the Master Trading Agreement and the Proprietary Account Purchase Agreement, shall be governed by, construed, and enforced in accordance with standard international corporate business laws. Any formal controversy arising out of this framework shall be settled through binding legal arbitration within specified regulatory venues.

☑ **I, the Trader, have read thoroughly, understood, and do hereby agree to be legally bound by all the provisions, rules, fee frameworks, and conditions set forth across this Master Trading Agreement and the Prop Account Purchase Agreement.**
